

PUBLIC REPORT 2010

Controlling Corporation

OZ Minerals Limited

Period to which this report relates

Start 1 July 2006

End 30 June 2010

(eg. for a Corporate Group with the trigger-year 2005-06, the report will cover the period 1.7.2006-30.6.2010)

Part 1 – Information on assessments completed to date

Table 1.1 – Description of the way in which the Corporate Group (or part of it) has carried out its assessments

OZ Minerals is an active participant in the Energy Efficiency Opportunities (EEO) program. During 2009, OZ Minerals went through a significant change to its company structure, which included the sale of operations that had previously been assessed under the EEO program. The assessments had identified a number of energy efficiency opportunities at these operations, and a significant amount of work had been carried out in progressing the implementation of the initiatives.

OZ Minerals has retained ownership of the Prominent Hill Copper-Gold operation in South Australia. The first quarter of 2009 saw the first copper concentrates exported to overseas markets. In effect this places the commencement date of the project from March 2009 and therefore the first complete capture of operational energy data for the operation. A requirement of the EEO program is to have two years of operational data to allow for an adequate assessment of the site's emissions. The Prominent Hill Operation's first Energy Efficiency Assessment will therefore be completed by June 30 2011.

The information from this assessment will subsequently be included in the OZ Minerals Limited 2011 EEO Public Report. OZ Minerals acknowledges that 30 June 2011 is the official end of the first five year reporting cycle and hence the information for the assessment will also be included in the 2011 Government Report. OZ Minerals recognizes that the six key elements of the Assessment framework (Leadership; People; Data and Analysis; Opportunity Identification and Evaluation; Decision Making; and Communicating Outcomes) are vital to a successful assessment, and these elements will be considered and incorporated throughout the assessment process.

Preparations for the first EEO assessment commenced at Prominent Hill during 2009, with a review of energy efficiency opportunities and current performance. A secondary review is currently being undertaken for incorporation into the 2011 Energy Efficiencies Assessment.

Part 1 – Information on assessments completed to date (continued)

Table 1.2 – Energy use assessed		
Group member and/or business unit and/or key activity and/or site (or part thereof) that has had an assessment completed by 30 June 2010 (Include all assessments completed to date for the current 5 year cycle).	Period over which assessment was undertaken¹	Energy use for the period 1.7.2009 to 30 June 2010 of the assessed entity (or part thereof) expressed in GJ²
Total energy use of assessed entities (or part thereof)		0GJ
Total energy use of the whole corporate group in the period 1.7.2009 to 30 June 2010		2 248 569 GJ
Total energy use of assessed entities (or part thereof) for the period 1.7.2009 to 30.6.2010 expressed as a percentage of total energy use for the period 1.7.2009 to 30.6.2010		0%

1. This should be the start and finish date (month and year) for the assessment (planned assessment dates were nominated in Table 3.1 of the approved ARS).

2. Energy Bandwidth may only be used if approved in the Assessment and Reporting Schedule.

Part 3 - Voluntary Contextual Information

Table 3.1 – Contextual Information

Caring for our people, our neighbours and the environment is central to the way OZ Minerals conducts business. OZ Minerals is committed to achieving Zero Harm by Choice, which requires us to embed a culture that ensures that the management of safety, health, environment and community comes naturally to our workforce and is a foremost consideration in every decision we make.

To achieve Zero Harm by Choice, OZ Minerals has established a number of sustainability objectives. A key objective is to ensure the effective stewardship of natural resources by minimizing the company's environmental footprint, reducing waste, and using energy, water and other raw materials efficiently.

OZ Minerals participates in the voluntary Carbon Disclosure Project (CDP) which assembles and publishes energy and greenhouse gas related information from over 2000 of the world's largest companies. OZ Minerals reports in accordance with the National Greenhouse and Energy Reporting Act.

Part 4 - Declaration

Table 4.1 - Declaration of accuracy and compliance (mandatory information)

The information included in this report has been reviewed and noted by the board of directors and is to the best of my knowledge, correct and in accordance with the *Energy Efficiency Opportunities Act 2006* and *Energy Efficiency Opportunities Regulations 2006*.

Terry Burgess (Managing Director and CEO)
