Forward Looking Statements

This presentation has been prepared by OZ Minerals Limited (OZ Minerals) and consists of written materials/slides for a presentation concerning OZ Minerals. By reviewing/attending this presentation, you agree to be bound by the following conditions.

No representation or warranty, express or implied, is made as to the fairness, accuracy, or completeness of the information, contained in the presentation or of the views, opinions and conclusions contained in this material. To the maximum extent permitted by law, OZ Minerals and its related bodies corporate and affiliates, and its respective directors, officers, employees, agents and advisers disclaim any liability (including, without limitation any liability arising from fault or negligence) for any loss or damage arising from any use of this material or its contents, including any error or omission there from, or otherwise arising in connection with it.

Some statements in this presentation are forward-looking statements. Such statements include, but are not limited to, statements with regard to capacity, future production and grades, projections for sales growth, estimated revenues and reserves, targets for cost savings, the construction cost of new projects, projected capital expenditures, the timing of new projects, future cash flow and debt levels, the outlook for minerals and metals prices, the outlook for economic recovery and trends in the trading environment and may be (but are not necessarily) identified by the use of phrases such as “will”, “expect”, “anticipate”, “believe” and “envisage”. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future and may be outside OZ Minerals’ control. Actual results and developments may differ materially from those expressed or implied in such statements because of a number of factors, including levels of demand and market prices, the ability to produce and transport products profitably, the impact of foreign currency exchange rates on market prices and operating costs, operational problems, political uncertainty and economic conditions in relevant areas of the world, the actions of competitors, activities by governmental authorities such as changes in taxation or regulation.

Given these risks and uncertainties, undue reliance should not be placed on forward-looking statements which speak only as at the date of the presentation. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, OZ Minerals does not undertake any obligation to publicly release any updates or revisions to any forward looking statements contained in this presentation, whether as a result of any change in OZ Minerals’ expectations in relation to them, or any change in events, conditions or circumstances on which any such statement is based.

Certain statistical and other information included in this presentation is sourced from publicly available third party sources and has not been independently verified.

All figures are expressed in Australian dollars unless stated otherwise.
A Modern Mining Company
Creating Innovative Exchanges and Partnerships

COLLABORATING

Focusing on partnerships and collaboration, not hierarchy

You seek to understand the perspectives of others and leverage their knowledge

You openly share and seek information and resources to achieve great things together

You contribute as a leader outside your domain

You work collaboratively in teams across levels and functions
The World is Changing
Lean and Innovative

What does it mean for us

“The Centre for Sustainable Planetary and Space Resources will enable us to jointly explore disruptive interdisciplinary research which is unseen within our existing structures. We will use this momentum, in a transdisciplinary fashion, to translate expertise in terrestrial industry into viable in-situ resource utilisation in space,” he says.

“Lessons learned from developing in-situ resource utilisation in space will have a direct impact on improving sustainable use of terrestrial resources, in much the same way that technology developed for early space exploration was applied to help improve life on Earth,” he says.

Lot Fourteen’s state-of-the-art facilities and diverse range of spaces for residents are home to innovators, pioneers, ground-breakers and thought leaders in a host of emerging and fast-evolving industries, including defence, space, artificial intelligence, cyber-security and creative industries.

Here, the world’s leading names in new technologies and defence, sit alongside visionary start-ups, perceptive entrepreneurs and, of course the Australian Space Agency, to share knowledge and build valuable networks.
Building an Innovation Culture
The Future of Work

Entrepreneurship

A person who starts their own business with a new idea or concept

Often have strong skills at reducing technical risk and business model risk, they prototype well, fail faster and prove concepts

Intrapreneurship

A person who promotes innovation within the limits of the organisation

Often surrounded by strong execution risk management, process leadership, successful launches and a culture of avoiding failure

INNOVATION IS AN ONGOING PROCESS THAT YOU BUILD INTO YOUR CULTURE
